

# London Metropolitan Branch Strategy

We believe that we must work together to achieve a safe and healthier world of work and IOSH, as the chartered body for health and safety, can lead the way.

The vision - a safe and healthy world of work – is a galvanising goal and WORK 2022 defines how we will lead our profession and collaborate with our stakeholders toward achieving it. It is a strategy and plan of action that should make a real difference to the lives of people at work.

There are three broad aims that underpin WORK 2022...

## Enhance, Collaborate and Influence

Enhance

“Enhance” is designed to elevate the status and capability of the occupational safety and health profession and promote it as an attractive first career of choice.

The Branch aim to give individuals the tools they require to be more effective and work to build appreciation for the added value the profession provides.

### To support this aim the Branch will:

- Develop and provide a varied branch programme
- Provide personal development support sessions for members
- Host Branch annual seminar
- Provide support and guidance to members in journey towards chartered membership
- Promote and maintain support for LMB Construction Section

Collaborate

“Collaborate” acknowledges that IOSH and our profession must work hand-in-hand with organisations and their representative bodies, maximising the benefits to business of good health and safety at work.

The Branch will draw from members' expertise, experience, skills and networks to develop and implement initiatives for how we work with organisations and businesses to move forward together

### To support this aim the Branch will:

- Liaise with other branches and groups to support activities
- Provide a Branch programme that offers learning opportunities from other businesses and professional bodies
- Collaborate and engage with educational establishments to facilitate health and safety understanding and research
- Support activities of other relevant organisations; use opportunities to work together on H&S
- Partner with other organisations and professional bodies to promote inclusion and enable participation

Influence

Knowledge gathered in looking after people at work – whether it's through research, innovation or lessons learned from mistakes – can move the health and safety profession forward and raise standards in worker protection.

The Branch will engage with organisations to understand their own, local challenges in protecting people from work-related injury and illness.

### To support this aim the Branch will:

- Identify and welcome international, national and first time visitors to the branch
- Identify network activities that the Branch can be involved in and support
- engage with local education providers to support EHS students
- host an annual award for students

Our branch strategy defines the steps that we, as a branch, need to take. We believe that we can make a change and improve the workplace – today and in the future. Help us to shape the future of health and safety and make WORK 2022 a reality.

We will monitor and evaluate our programmes and their impact and provide feedback to members accordingly
