HSE Strategy 2020 - 2030

- Currently being developed
- Strategic Document
- Background: Political and Financial Uncertainty

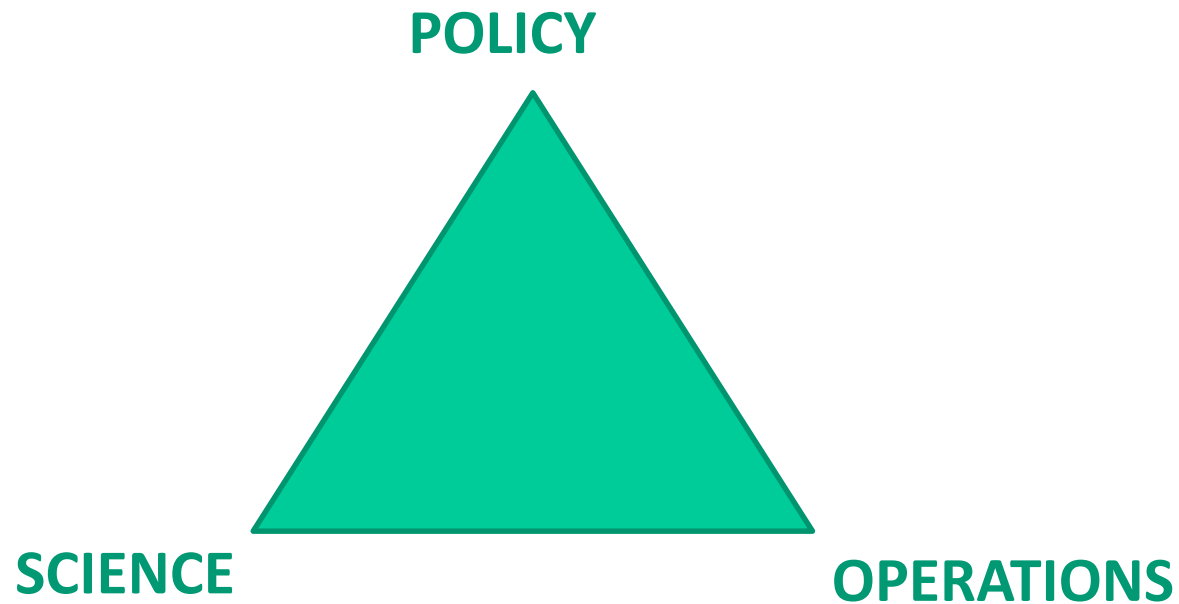

HSE Strategy 2020 - 2030

- Changing employee relationships
- Automation
- Work Dynamics
- Demographic change

HSE Strategy 2020 - 2030

- Link to national Civil Service goals:
 - Health
 - Productivity
 - Good Work
 - Global GB
 - Environment & Energy
 - Mobility
 - Innovation

HSE Strategy 2020 - 2030

HSE Workplan 2019-2020

“ Prevent death, injury and ill health in GB’s workplaces”

HSE Workplan 2019-2020

HIGH RISK AREAS

- Woodworking
- Food
- Healthcare
- DtM Asbestos
- Waste & Recycling
- Healthcare
- Agriculture
- Metal Fabrication
- Car Washes
- Other Ill Health...

CONSTRUCTION

- Wood Dust
- Asbestos
- Silica

Woodworking

- Wood Dust Control
 - Respiratory Sensitiser
 - Extraction
 - Cleaning
 - RPE

FOOD Manufacturing

- MSDs
 - 40% of Manufacturing III health
 - MAC Tool
- Flour Dust

Duty to Manage Asbestos

- Education and Healthcare
- 2,595 mesothelioma deaths in Great Britain in 2016
- Assessment
- Plan
- Training
- Monitoring
- Contractor Control

Healthcare

- CQC / HSE MoU
- Violence and Aggression:
 - assault rate of 21 per 1,000 staff in acute care and 191 per 1,000 in Mental Health
- Muscular-Skeletal Disorders: 30% of 7day + Absences

Waste and Recycling

- Over the last 5 years, average 8 fatalities annually.
- 2017/18 there were 12 fatal injuries.
- 74% of all fatal injuries were related to transport, machinery and being struck by objects.
- The fatality rate is 16 times higher than general industry
- Significant Ill Health

Metal Fabrication

- Welding Fume
- Metalworking Fluids
- Targeted Campaign Winter 2020

Change in Enforcement Expectations for Mild Steel Welding Fume

Health and Safety Executive - Safety alert

Health and Safety Executive - Safety alert	
Department Name:	All HSE
Bulletin No:	STSU1 – 2019
Issue Date:	February 2019
Target Audience:	All workers, employers, self-employed, contractors' and any others who undertake welding activities, including mild steel, in any industry.
Key Issues:	<ul style="list-style-type: none"> ▪ There is new scientific evidence that exposure to all welding fume, including mild steel welding fume, can cause lung cancer. ▪ There is also limited evidence linked to kidney cancer. ▪ There is a change in HSE enforcement expectations in relation to the control of exposure of welding fume, including that from mild steel welding. ▪ All businesses undertaking welding activities should ensure effective engineering controls are provided and correctly used to control fume arising from those welding activities. ▪ Where engineering controls are not adequate to control all fume exposure, adequate and suitable respiratory protective equipment (RPE) is also required to control risk from the residual fume.

Agriculture

- Insight work
- Agricultural Compliance Events
- Targeted Inspections
 - Cattle Handling
 - Risk to MoPs
 - Bale Stacking
 - Slurry Pits
 - Transport
 - Work at Height

Car Washes

- Electrical Safety focus
- COSHH Issues
- Joint working to tackle labour abuse

Manufacturing: Other Ill Health

- Molten Metals: Silica
- Rubber: Fume
- Mineral Products: Silica

Fairgrounds

- Target specific rides
- Maintenance

Legionella

- 3rd Parties
- Water Treatment Companies
- Providing Competent Services

Construction

- Continued health focus
 - Wood Dust
 - Silica Dust
 - Asbestos
- Refurbishment

Notable Work Cumbria & North Lancashire

- Enforcement Summary
 - 8 Prosecutions
 - 203 enforcement notices

Forestry

- Management
- Welfare
- Chainsaw Use

Vaping Manufacturers

- Inspections
- Product Supply

Brick Manufacturer Incident

- Amputation & Paralysis
- Lock off Procedures
- Training
- Culture

Local Authority Bin Wagon

- Leg Amputation
- Competency of Drivers
- Risk Assessments

Lifting Fatality

- Contract Lift
- Employee Involved

3 x Fall from Height Incidents

- Serious Injuries
- Agricultural Buildings
- Planning
