

BESPOKE SOLUTIONS FOR CONSULTANTS

Working together to deliver support, reassurance and a safer healthier work place to clients

Consultants play a crucial role in delivering health and safety advice across the world. From preparing risk assessments and policies to undertaking audits and training. We believe that the support of a Consultant for their customer is key, and legal issues are frequently an area where both Consultants and customers alike have questions and seek clarity.

DACB HSCS CONSULTANCY ALLIANCE

Our HSCS Consultancy Alliance provides a number of benefits to both Consultants and their customers. Free membership of our HSCS Consultancy Alliance includes:

- Receiving legal updates
- Free webinar places
- Access to our bi-yearly Virtual Consultancy Alliance breakfast catch-up, an hour long session where Consultants can raise issues and share best practice around legal concerns or issues.

We understand that it is important to Consultants to be able to direct their customers to specialist support when they need it. In the event of your customer requiring legal support (subject to conflict checks) we can support your customer in dealing with the aftermath of a serious or fatal accident, or provide other advice such as appealing Enforcement Action or querying FFI bills*.

SPECIALIST CONSULTANCY TRAINING WORKSHOPS

We have two specialist workshops designed specifically for Health and Safety Consultants, price available upon enquiry.

Witness Interview Workshop

We know that taking a witness statement for the right reasons, at the right time, and asking the right questions is not straightforward, especially where there may be a number of different investigations ongoing, such as police, HSE and Coronial. Our 1 hour witness interview workshop provides insight into key considerations for meeting interviews and obtaining information.

Investigation Report Writing Workshop

No author wants to see the content of his or her internal investigation report being used against the organisation who commissioned it. However, we have seen how Regulators who have requested internal investigation reports, seize on aspects of these reports to prepare and bring prosecutions, often leaving the author, normally a Manager, HS Adviser or Consultant giving evidence against their own organisation or customer. This 1 hour session considers key issues behind report writing and the potential legal implications for both the author and the organisation.

"I wanted to thank you personally for organising the workshop, it really opened up my eyes to that side of things, which of course we never think will happen. How mistakes were made certainly showed us how we could face a similar situation. It reminded us of the responsibility we have and how important our roles are."
